IT Security Specialist

Are you looking for a career in the fastest growing IT career field? Would you like to use your knowledge and skills with a growing and successful company in the insurance industry? As a Security Specialist at Great West Casualty Company you will:

- work with new technologies in an ever-changing environment
- minimize security threats by performing security analysis across various platforms, systems and devices.
- manage and mitigate risk thru performing quarterly scans, looking for vulnerabilities in the system.
- help transition to a new security framework, work with other security professionals on changes to security policies.
- have the opportunity to be a liaison with business management by coordinating/communicating information technology and security policies across the company.

We are looking for someone with:

- a degree with an emphasis in Network Security, Network and System Administration, Computer Forensics or certifications in Security Plus, SSCP or Microsoft Security
- experience with VM Security, IPS/IDS, firewalls and other security or systems a plus
- high level attention to detail
- strong written and verbal communication skills

We offer you a challenging career with a competitive compensation and benefits package. To learn more or to apply by April 20, 2015, please view the career section of our web site at www.gwccnet.com. After visiting with us, you will agree that at Great West...The Difference is Service®.
